Introduction

Australia Building Components Flooring System is made up of two product lines, Hardwood Flooring and Engineered Timber Flooring. Our flooring is made in a FSC certified manufacturing facility in order to providing the best performance in the most environment friendly way.

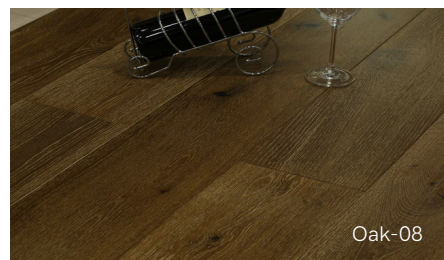

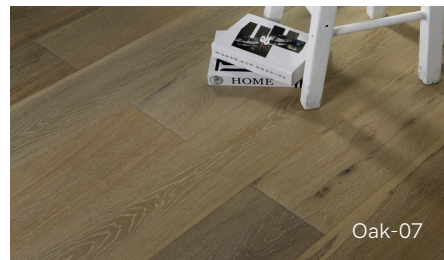

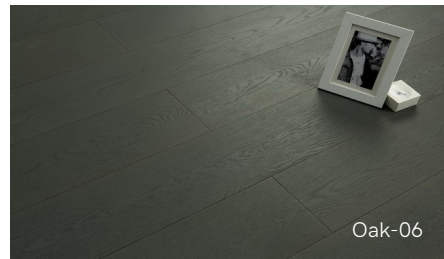

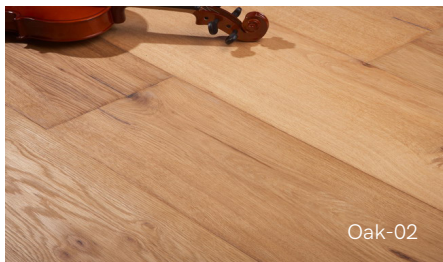

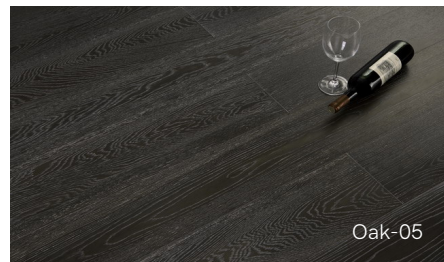

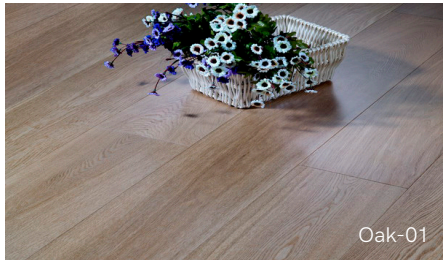

Hardwood flooring is made for the sport and the indoor venues, equipped with solid hardwood panels. The sport product line is constructed with backing frame for matching the sport requirement. Major usages include basketball, volleyball, badminton courses and most other sport venues. Other usages include residential and commercial building as well as other indoor areas.

Engineered timber flooring is one of the best options in the market for user on a budget and looking for a product to provide a great performance for long term use while the outlook of natural wood is contained.
